

网站制作-白无常

网页制作灵感网站：

完整网站动效风格：[MotionSites — Premium Hero Prompts](#)

文字动效/背景/元素：<https://reactbits.dev/animations/fade-content>

可完整复制前端代码：aura.build

多种前端代码一件复制：<https://21st.dev/community/components>

一站式收录苹果风格排列：<https://bentogrids.com/>

制作自己的网站：

首先可以在网上找自己喜欢的参考风格；[MotionSites](#)；带有copy的就是我们可以复制的：

这里复制的都是网页的提示词：**提示词都是可以修改的**；不是一定要用它的；提前准备好视频链接可以减少你codex的额度；省的一遍遍修改；

首先这里的提示词会告诉你它的组成部分：比如：**Build a single-page hero section with a full-screen looping background video, liquid glass UI elements, and a dark cinematic aesthetic. Use React, TypeScript, Tailwind CSS, and Lucide React icons. Here are the exact specifications:**（构建

一个单页首屏（Hero Section），包含全屏循环播放的背景视频、流体玻璃质感的 UI 元素以及深色电影级视觉风格。请使用 React、TypeScript、Tailwind CSS 和 Lucide React 图标。具体规格如下：)

T :: 复制出来的提示词

Build a single-page hero section with a full-screen looping background video, liquid glass UI elements, and a dark cinematic aesthetic. Use React, TypeScript, Tailwind CSS, and Lucide React icons. Here are the exact specifications:

Background Video:

Full-screen muted autoplaying video covering the entire viewport, positioned absolutely with object-cover

Video source URL:
https://d8j0ntlcm91z4.cloudfront.net/user_38xzZboKViGWJOttwIXH07IWA1P/hf_20260328_115001_bcdaa3b4-03de-47e7-ad63-ae3e392c32d4.mp4

The video is shifted down by 17% (translate-y-[17%]) so the top portion of the video is cropped -- the interesting content is in the lower portion of the frame

The video loops seamlessly with a custom JavaScript fade system (no CSS transitions): 500ms requestAnimationFrame-based fade-in on load/loop start, 500ms fade-out when 0.55 seconds remain before the video ends. A fadingOutRef boolean prevents re-triggering the fade-out from repeated timeUpdate events. On ended, opacity is set to 0, then after 100ms the video resets to currentTime = 0, plays, and fades back in. Each new fade cancels any running animation frame to prevent competing animations.

就已经交代了 这是一个单页的首屏；动画是循环播放；什么样的质感；

第二句：告诉codex它的视频链接是什么；这个时候你可以提前准备好你要放入这个首屏的视频内容；就会在第一次写代码的时候放置进去；

复制出来的提示词；要做的首屏效果；

这个时候没有自己的视频；我们只需要有首尾帧即可；可以在lib tv或者即梦生成视频；

首尾帧动画；产品动画；固定镜头；动画从图1  logo gin design branding F 自然炸开过渡到  logo gin design branding F；产品不动；tvc广告；4K；超级细节 Seedance 2.0 VIP | 8s | 详细信息 

 重新编辑

 再次生成

...

得到视频之后；

拿去codex生成；给他指令：

01 复制你的提示词；

02 把你的视频或者你有视频链接最好；直接复制在你的提示词中：比你直接先生成效果再去更换视频内容更省codex额度；

Background Video:

Full-screen muted autoplaying video covering the entire viewport, positioned absolutely with object-cover

Video source URL:

https://d8j0ntlcm91z4.cloudfront.net/user_38xzZboKViGWJOttwIXH07IWA1P/hf_20260328_115001_bcdaa3b4-03de-47e7-ad63-ae3e392c32d4.mp4

The video is shifted down by 17% (translate-y-[17%]) so the top portion of the video is cropped -- the interesting content is in the lower portion of the frame

03 我们得到网页预览后；把这些文字更换为自己的文字内容；可以使用codex自带的标注功能；精确改文字内容；

- 首屏做完之后；可以在其他前端网页链接继续做你的第二屏内容；挑选一些排版的网站
- 有的网站上提供代码的；直接点击：copy prompt；丢给codex即可；剩下的就是结果出来后；丢给它你要插入的图片内容

如果你喜欢的排版内容但是没有代码可以复制；也没有关系；依然是丢给codex；它会分析；并生成

生成需要的排版之后；可以插入自己的动画；或者产品图片；
让你的动画更加有趣：可以在<https://21st.dev/community/components>插入一些有趣的效果
