

3D Collectible Hero

Build a single full-viewport hero section in React + TypeScript + Vite + Tailwind CSS, using `lucide-react` for icons. The component is a character-figurine carousel called "TOONHUB".

Fonts (load in `index.html` head):

代码块

```
1 <link rel="preconnect" href="https://fonts.googleapis.com" />
2 <link rel="preconnect" href="https://fonts.gstatic.com" crossorigin />
3 <link href="https://fonts.googleapis.com/css2?
  family=Anton&family=Inter:wght@400;500;600;700&display=swap" rel="stylesheet"
  />
```

Body font: `'Inter', sans-serif`. Display font (huge ghost text + bottom-right link):
`'Anton', sans-serif`.

Image data (4 items, exact URLs and colors):

6 ];
```

Preload all 4 images on mount via `new Image()`.

State & logic:

- `activeIndex` (0-3), `isAnimating` boolean lock, `isMobile` (`window.innerWidth < 640`), updated on resize).
- `navigate('next' | 'prev')`: ignore if animating; set `isAnimating=true`; bump `activeIndex` `(prev+1)%4` or `(prev+3)%4`; release lock after `650ms`.
- Roles derived from `activeIndex`: `center=activeIndex`, `left=(activeIndex+3)%4`, `right=(activeIndex+1)%4`, `back=(activeIndex+2)%4`.

Layout structure:

Outer `<div>` has `backgroundColor: IMAGES[activeIndex].bg`, transition `background-color 650ms cubic-bezier(0.4,0,0.2,1)`, `fontFamily: 'Inter, sans-serif'`, `relative w-full overflow-hidden`. Inside, a `relative w-full` div with `height: 100vh; overflow: hidden`.

1. **Grain overlay** (`absolute inset-0 pointer-events-none`, `zIndex 50`): SVG `fractalNoise` data URI, `baseFrequency=0.9`, `numOctaves=4`, `opacity 0.08` inside SVG, container `opacity: 0.4`, `backgroundSize: 200px 200px`, repeat.
2. **Giant ghost text "3D SHAPE"** (`absolute inset-x-0 flex items-center justify-center pointer-events-none select-none`, `zIndex 2`, `top: 18%`): font Anton, `fontSize: clamp(90px, 28vw, 380px)`, `weight 900`, `color white`, `opacity 1`, `lineHeight 1`, `uppercase`, `letterSpacing -0.02em`, `whiteSpace nowrap`.
3. **Top-left brand label "TOONHUB"** (`absolute top-6 left-4 sm:left-8`, `zIndex 60`): `text-xs font-semibold uppercase`, `white`, `opacity 0.9`, `letterSpacing 0.18em`.
4. **Carousel** (`absolute inset-0`, `zIndex 3`): map all 4 IMAGES; each item is `position:absolute`, `aspectRatio: '0.6 / 1'`, with role-based styles below. Inside, an `<img>` `width:100%; height:100%; objectFit:contain;` `objectPosition:bottom center;` `draggable=false`.

Per-role style:

- **center:** `transform: translateX(-50%) scale(${isMobile?1.25:1.68})`, no blur, opacity 1, zIndex 20, `left:50%`, `height: isMobile?'60%':'92%'`, `bottom: isMobile?'22%':0`.
- **left:** `translateX(-50%) scale(1)`, blur 2px, opacity 0.85, zIndex 10, `left: isMobile?'20%':'30%'`, `height: isMobile?'16%':'28%'`, `bottom: isMobile?'32%':'12%'`.
- **right:** same as left but `left: isMobile?'80%':'70%'`.
- **back:** `translateX(-50%) scale(1)`, blur 4px, opacity 1, zIndex 5, `left:50%`, `height: isMobile?'13%':'22%'`, `bottom: isMobile?'32%':'12%'`.

Transition on each item: `transform 650ms cubic-bezier(0.4,0,0.2,1)`, `filter 650ms ...`, `opacity 650ms ...`, `left 650ms ...`. `willChange: transform, filter, opacity`.

5. Bottom-left text + nav buttons (`absolute bottom-6 left-4 sm:bottom-20 sm:left-24`, zIndex 60, `maxWidth:320px`):

- `<p>` "TOONHUB FIGURINES" — bold uppercase, tracking-widest, `mb-2 sm:mb-3 text-base sm:text-[22px]`, white, opacity 0.95, letterSpacing `0.02em`.
- `<p>` (hidden on mobile, `hidden sm:block`): "The artwork is stunning, shipped fully prepared. The finish is a vision, the 3D craft is flawless. Many thanks! Wishing you the win. Order now." — `text-xs sm:text-sm`, white, opacity 0.85, lineHeight 1.6, `mb-4 sm:mb-5`.
- Two circular buttons (`w-12 h-12 sm:w-16 sm:h-16`, transparent bg, 2px white border, white icon): `ArrowLeft` and `ArrowRight` from lucide-react, size 26, strokeWidth 2.25. On hover: scale 1.08 + bg `rgba(255,255,255,0.12)`. Transition `transform 150ms, background-color 150ms`. Click triggers `navigate('prev')` / `navigate('next')`.

6. Bottom-right link "DISCOVER IT" (`absolute bottom-6 right-4 sm:bottom-20 sm:right-10`, zIndex 60): `<a>` flex items-center, font Anton, `fontSize: clamp(20px, 4vw, 56px)`, weight 400, white, opacity 0.95→1 on hover (200ms), letterSpacing `-0.02em`, lineHeight 1, uppercase, no underline. Followed by `ArrowRight` (`w-5 h-5 sm:w-8 sm:h-8`, strokeWidth 2.25).

Behavior summary: clicking arrows rotates roles; background color, image positions, scales, blurs, and opacities all crossfade simultaneously over 650ms with `cubic-bezier(0.4,0,0.2,1)`. The character images sit at the bottom of the screen overlapping the giant "3D SHAPE" text behind them.
