

Grow AI Talent Platform

Build a dark-themed landing page hero section with a navbar, headline, CTA button, background video with fade-in/out loop, and a logo marquee. Use React + Vite + Tailwind CSS + TypeScript with shadcn/ui. Install @fontsource/geist-sans.

1. Theme & Design Tokens (index.css)

Set up a single dark theme (no light mode toggle). All colors in HSL:

```
:root {  
  --background: 260 87% 3%;  
  --foreground: 40 6% 95%;  
  --card: 240 6% 9%;  
  --card-foreground: 40 6% 95%;  
  --popover: 240 6% 9%;  
  --popover-foreground: 40 6% 95%;  
  --primary: 262 83% 58%;  
  --primary-foreground: 0 0% 100%;  
  --secondary: 240 4% 16%;  
  --secondary-foreground: 40 6% 95%;  
  --muted: 240 4% 16%;  
  --muted-foreground: 240 5% 65%;  
  --accent: 262 83% 58%;  
  --accent-foreground: 0 0% 100%;  
  --destructive: 0 84.2% 60.2%;  
  --destructive-foreground: 0 0% 100%;  
  --border: 240 4% 20%;  
  --input: 240 4% 20%;  
  --ring: 262 83% 58%;  
  --radius: 0.75rem;
```

```
--hero-heading: 40 10% 96%;  
--hero-sub: 40 6% 82%;  
}
```

Body font: 'Geist Sans', 'Inter', system-ui, sans-serif

Import these font weights:

```
@import "@fontsource/geist-sans/400.css";  
@import "@fontsource/geist-sans/500.css";  
@import "@fontsource/geist-sans/600.css";  
@import "@fontsource/geist-sans/700.css";
```

2. Liquid Glass Utility (index.css)

Add a .liquid-glass utility class in @layer utilities:

```
.liquid-glass {  
  background: rgba(255, 255, 255, 0.01);  
  background-blend-mode: luminosity;  
  backdrop-filter: blur(4px);  
  -webkit-backdrop-filter: blur(4px);  
  border: none;  
  box-shadow: inset 0 1px 1px rgba(255, 255, 255, 0.1);  
  position: relative;  
  overflow: hidden;  
}
```

```
.liquid-glass::before {  
  content: '';  
  position: absolute;  
  inset: 0;  
  border-radius: inherit;  
  padding: 1.4px;  
  background: linear-gradient(180deg,
```

```
    rgba(255,255,255,0.45) 0%, rgba(255,255,255,0.15) 20%,
    rgba(255,255,255,0) 40%, rgba(255,255,255,0) 60%,
    rgba(255,255,255,0.15) 80%, rgba(255,255,255,0.45) 100%);
-webkit-mask: linear-gradient(#fff 0 0) content-box, linear-gradient(#fff 0 0);
-webkit-mask-composite: xor;
mask-composite: exclude;
pointer-events: none;
}
```

3. Tailwind Config

Add these to tailwind.config.ts:

All the semantic color tokens mapped to hsl(var(--token))

A hero color group: hero.heading and hero.sub

A marquee keyframe: 0% { transform: translateX(0%) } → 100% { transform: translateX(-50%) }

Animation: marquee: "marquee 20s linear infinite"

4. Button Variants

In the shadcn button.tsx, add two custom variants:

hero: "bg-primary text-primary-foreground rounded-full px-6 py-3 text-base font-medium
hover:bg-primary/90"

heroSecondary: "liquid-glass text-foreground rounded-full px-6 py-3 text-base font-normal
hover:bg-white/5"

5. Navbar Component

Full-width, py-5 px-8, flex row, justify-between

Left: A logo image (32px height). Use a logo.png from src/assets/logo.png

Center: Nav items as plain buttons: "Features" (with ChevronDown icon), "Solutions", "Plans",
"Learning" (with ChevronDown icon). Text is text-foreground/90 text-base, gap-1 between items

Right: "Sign Up" button using heroSecondary variant, size="sm", rounded-full px-4 py-2

Below the navbar, add a full-width 1px gradient divider: mt-[3px] w-full h-px bg-gradient-to-r
from-transparent via-foreground/20 to-transparent

6. Hero Section

Section with `bg-background relative overflow-hidden`

Contains the Navbar at the top

Below navbar + divider, centered content with `pt-20 px-4`

Headline "Grow": `text-[230px] font-normal leading-[1.02] tracking-[-0.024em]`, font-family 'General Sans', sans-serif, `bg-clip-text text-transparent with background-image: linear-gradient(223deg, #E8E8E9 0%, #3A7BBF 104.15%)`

Subtext: `text-hero-sub text-center text-lg leading-8 max-w-md mt-4 opacity-80`, two lines: "The most powerful AI ever deployed" / "in talent acquisition" (split with `<br/>`)

CTA Button: `heroSecondary variant`, text "Schedule a Consult", `px-[29px] py-[24px]`, wrapped in a div with `mt-8 mb-[66px]`

7. Social Proof / Video Section

Immediately below the hero, a separate `<section>` with `relative w-full overflow-hidden`.

Background Video: `<video>` element: `autoPlay muted playsInline, absolute inset-0 w-full h-full object-cover, initial style={{ opacity: 0 }}`

Source URL:

https://d8j0ntlcm91z4.cloudfront.net/user_38xzZboKVIGWJOttwIXH07IWA1P/hf_20260308_114720_3dabeb9e-2c39-4907-b747-bc3544e2d5b7.mp4

Fade logic (JavaScript): Use `requestAnimationFrame` to continuously read `currentTime` and `duration`. Fade in over 0.5s at the start, fade out over 0.5s at the end. On ended, set `opacity` to 0, wait 100ms, reset `currentTime = 0`, and `play()` again. This creates a seamless manual loop with fade transitions.

Gradient overlays: `absolute inset-0 bg-gradient-to-b from-background via-transparent to-background`

Content (z-10): `flex flex-col items-center pt-16 pb-24 px-4 gap-20`

A h-40 spacer div for video visibility

Logo Marquee at `max-w-5xl`:

Left side: text "Relied on by brands / across the globe" in `text-foreground/50 text-sm`, with `<br/>`, `whitespace-nowrap shrink-0`

Right side: horizontally scrolling marquee using `animate-marquee` (the 20s infinite animation)

Logos are placeholder brands: Vortex, Nimbus, Prysma, Cirrus, Kynder, Halcyn — duplicated for seamless loop

Each logo: a small liquid-glass w-6 h-6 rounded-lg square with the first letter, plus the brand name in text-base font-semibold text-foreground

Gap between logos: gap-16

8. Page Composition

The Index page simply renders `<HeroSection />` then `<SocialProofSection />` sequentially with no wrapper styling.
