

CodeNest Coding Platform

Create a high-end, dark-themed hero section for a coding education platform called 'CodeNest' using React and Tailwind CSS. The design must be responsive and follow these precise specifications:

1. Background & Layout:

Background: Implement a full-screen background video using the HLS stream: <https://stream.mux.com/tLkHO1qZoaaQOUeVWo8hEBeGQfySP02EPS02BmnNFyXys.m3u8>. Use `hls.js` and set `enableWorker: false` to ensure stability in sandboxed environments.

Overlays: Set the video to 60% opacity. Add a dark linear gradient from the left (#070b0a to transparent) and a bottom-up gradient for readability.

Grid System: Add three thin vertical grid lines (white/10 opacity) at the 25%, 50%, and 75% marks across the screen (visible on desktop).

Central Glow: Place a large horizontal SVG ellipse glow in the center-top area with a cyan/dark green hue, using a 25px Gaussian blur filter.

2. The Liquid Glass Card:

Component: Create a 200x200px floating card positioned above the main headline, shifted exactly 50px upwards using `translate-y-[-50px]`.

CSS Styling (Liquid Glass):

`background: rgba(255, 255, 255, 0.01) with background-blend-mode: luminosity.`

`backdrop-filter: blur(4px).`

box-shadow: inset 0 1px 1px rgba(255, 255, 255, 0.1).

Border Effect: A ::before pseudo-element with inset: 0, padding: 1.4px, and a 180-degree white linear gradient. Use -webkit-mask-composite: xor and mask-composite: exclude to create a sharp, high-end border frame.

Content: '[2025]' tag (14px), 'Taught by Industry Professionals' headline (18px, using Instrument Serif italic for 'Industry'), and a small description (11px).

3. Hero Content & Typography:

Eyebrow: 'Career-Ready Curriculum' in Plus Jakarta Sans, bold, 11px, color #5ed29c.

Main Headline: 'LAUNCH YOUR CODING CAREER.' in Inter Extra Bold, uppercase, tracking-tight. Scale from 40px (mobile) to 72px (desktop). The final period must be green (#5ed29c).

Description: 'Master in-demand coding skills...' in Inter, 14px, 70% white opacity, max-width 512px.

Primary CTA: 'Get Started' button with an ArrowRight icon. Rounded-full, background #5ed29c, text #070b0a, uppercase, bold.

4. Global Navigation:

Header: Sticky/Absolute header with a white minimalist logo.

Desktop Menu: Links for 'PROJECTS', 'BLOG', 'ABOUT', 'RESUME' in Inter, 16px. Hover state: #5ed29c.

Mobile Menu: A functional hamburger menu that toggles a full-screen dark overlay.

5. Required Imports:

Fonts: Inter, Plus Jakarta Sans, and Instrument Serif (italic).

Icons: lucide-react (ArrowRight, Menu, X).

Library: hls.js for video streaming.
