

Evergreen Finance

Build a "Kova" fintech landing page in React + Vite + Tailwind CSS + Framer Motion + Lucide React. The page has 3 sections: a full-screen Hero with a boomerang video background, a Testimonial section, and a Features section. Use the exact specifications below. Do NOT use purple/indigo colors anywhere.

Fonts

Load these two web fonts in `index.html` via `<link>` tags:

- `https://db.onlinewebfonts.com/c/53077f9a3eee9c479d37d6af20394ded?family=Cooper+BT+W01+Light`
- `https://db.onlinewebfonts.com/c/5ade3423145f3b9f7031574333ca0b73?family=Cooper+BT+W01+Medium`

Define two utility classes in your CSS:

- `.font-cooper` — `font-family: 'Cooper BT W01 Light', 'Georgia', serif;`
 - `.font-cooper-medium` — `font-family: 'Cooper BT W01 Medium', 'Cooper BT W01 Light', 'Georgia', serif; font-weight: 500;`
-

Color Palette

- Primary dark green: `#08150C`
- Hover dark green: `#1a2e1f`
- Warm cream background: `#FDF5EB`

- Light beige card: #EBE4DC
 - Inner card beige: #F4F1EC
 - Donut chart colors: #C46B2D, #7A8C3E, #A8B87A, #B8AFA4
 - Body/text: stone-600, stone-700, stone-800 (Tailwind)
 - Accent greens: emerald-400, emerald-500 (Tailwind)
-

ANIMATIONS (FadeUp Component)

Create a reusable `<FadeUp>` component using Framer Motion with two modes:

- **immediate (prop):** Animates on mount using `animate="visible"` — used for Hero elements.
- **Default (scroll-triggered):** Uses `whileInView="visible"` with `viewport={{ once: true, margin: '-60px' }}` — used for Testimonial and Features sections.

Variants:

- `hidden`: { opacity: 0, y: 24, filter: 'blur(8px)' }
- `visible`: { opacity: 1, y: 0, filter: 'blur(0px)' }
- `Transition`: { duration: 0.7, delay: [configurable], ease: [0.25, 0.1, 0.25, 1] }

Props: `children`, `delay` (default 0), `className`, `immediate` (default false).

SECTION 1: HERO (full viewport height)

Background — Boomerang Video

Create a `<BoomerangVideoBg>` component that:

1. Loads this video (muted, playsInline, crossOrigin="anonymous"):
`https://d8j0ntlcm91z4.cloudfront.net/user\_38xzZboKViGWJOttwIXH07lWA1P/hf\_20260517\_070729\_32a7eb4e-d6e2-4571-badc-91b4dab1ecbe.mp4`
2. Captures every frame into offscreen canvas elements (max width 960px) as the video plays through once using `requestVideoFrameCallback` (with a `requestAnimationFrame` fallback).
3. After the video ends, plays back captured frames in a forward/reverse boomerang loop on a visible `<canvas>` at 30fps.
4. Wraps everything in `absolute inset-0 w-full h-full scale-[1.08] origin-center`.
5. Shows the `<video>` while capturing, then swaps to the `<canvas>` once frames are ready.

Navbar (FadeUp delay=0, immediate)

- Flex row, `justify-between`, padding `px-5 sm:px-10 lg:px-16 py-5`
- Left: Brand name "Kova" in `font-cooper text-xl sm:text-2xl text-[#08150C] tracking-tight`
- Center (hidden on mobile, `hidden md:flex`): Links "Explore", "Pricing" (active with underline bar), "Perks", "Reach" — `text-sm text-stone-700`, hover to `text-[#08150C]`. Active link has `font-medium text-[#08150C]` with `absolute -bottom-1 left-0 right-0 h-0.5 bg-[#08150C] rounded-full` underline span.
- Right desktop: "Get Started" button — `bg-[#08150C] text-white text-sm font-medium px-5 py-2.5 rounded-xl hover:bg-[#1a2e1f]`
- Right mobile: Hamburger (Menu/X icons from Lucide, size 22), toggles a dropdown menu with same links + button, styled `bg-white/95 backdrop-blur-md shadow-lg`

Hero Content (centered, flex-col items-center text-center)

- `px-5 sm:px-10 pt-8 sm:pt-14 pb-8 sm:pb-14`
- **Heading** (FadeUp delay=0.1, immediate): `font-cooper text-[2.2rem] sm:text-5xl md:text-6xl lg:text-7xl text-[#08150C] leading-tight max-w-5xl tracking-tight` — Text: "Own your money and build the wealth you deserve"

- **Subtext** (FadeUp delay=0.25, immediate): `mt-4 sm:mt-5 text-sm sm:text-base text-stone-600 max-w-sm sm:max-w-md leading-relaxed` — Text: "Step into a smarter way to bank, right from your pocket. Kova gives you instant control over your money, wherever you are."
- **CTA Buttons** (FadeUp delay=0.4, immediate): Two buttons in `flex-col sm:flex-row gap-3`:

 - b. "Get the App" — bg-[#08150C] text-white, Download icon (size 14), rounded-xl

Dashboard Cards (bottom of hero, FadeUp immediate)

Three cards in a flex row (`items-end justify-center gap-2 sm:gap-4`), outer two hidden on mobile (`hidden sm:block`):

RESPONSIVE BEHAVIOR

- Mobile-first. Cards stack on small screens (1 col), 2 cols at `sm` , 4 cols at `lg` .
- Hero dashboard cards: outer two hidden below `sm` .
- Nav links/CTA hidden below `md` , replaced by hamburger menu.
- All text sizes step up at `sm` and `md` breakpoints.
- Testimonial grid is single column on mobile, `3fr 2fr` at `md` .

KEY IMPLEMENTATION NOTES

- The entire page background is white for the hero (video fills it) and `#FDF5EB` for the lower two sections.
- All buttons use `rounded-xl` (not full pill).
- The BoomerangVideoBg uses `scale-[1.08]` to prevent edge gaps during playback.
- No page scroll on the hero (`min-h-screen overflow-hidden`).
- The hero content uses `flex-1 flex flex-col justify-between` to push cards to the bottom.
